Curling Club's Annual Bonspiel Ends Successfully

VISITORS WALK OFF WITH TWO MAJOR EVENTS; GOODERICH OF ACME TAKES ONTARIO LAUNDRY EVENT; ROBERTS OF DRUMHELLER WINS CITIZENS EVENT; McNICHOL OF CARBON WINS RED AND WHITE EVENT.

The annual bonspiel of the Carbon Curling club was brought to a close on Monday night of this week when the Red and White competition was completed. Owing to poor condition of the ice this event was postponed from last Friday.

This year the visitors carried off the two main competitions, Gooderich of Acme winning the Ontario Laundry event and Roberts of Drumheller capturing the Citizens event. In the Red and White event, McNichol of Carbon was the winner.

The final games in the two main competitions were played on very poor ice, considerable water being in evidence before the games were completed. It was for this reason that the Red and White competition was not played according to schedule.

There are three visiting rinks tied for first place in the Grand Aggregate, and as soon as the draw is completed these rinks will return to Carbon to decide the winner.

The following is a complete list of

the games that were played during the bonspiel:

Ontario Laundry Event

To bring this event into the sixteens, Jackson won from F. Poxon, Roberts from J. C. Smith; L. Poxon from McKenzie, McGregor from Torrance. All other rinks received byes. Coming into the eighths, Jackson won from Roberts, L. Poxon from McGregor; Fairbairn from Tolton; Stone from Tricker; Reid from Leitch; Greenan from McNichol, Gooderich from Yavis and McKibbin from Powers. Taking this event to the semi-finals, Jackson won from L. Poxon; Fairbairn from Stone; Reid from Greenan and Gooderich from McKibbin. Bringing this competition to the finals, Jackson won from Fairbairn and Gooderich from Reid. In the final game Gooderich won from Jackson.

Citizens Event

To bring this event into the sixteens Powers won from Greenan, McNichol from Leitch; Tricker from Yavis; and Fairbairn from McKibbin. All other

DEATH OF WILLIAM WATKINS

Another resident of the district passed away on Wednesday last in the person of William Watkins, a farmer living near Carbon. The late Mr. Watkins was 54 years of age and leaves to mourn his loss a sorrowing wife and nephew living here.

Funeral services of the late Mr. Watkins were held from the Anglican Church, Carbon, on Friday afternoon at 3.30 o'clock, and a large number of friends were present to pay their last respects to the deceased.

The pall bearers were Messrs. H. Evans; J. Bacon, G. Cadman, L. Abram, Clyde White and Walter Morrison.

Rev. L. D. Batchelor had charge of the funeral services.

WHOEVER CALLED THEM "POOR FISH"

Just another fish story, but this time the fish didn't bite but were bitten and by the strong spirits of home-brew.

Last summer, people on the Red River, around Winnipeg, wondered at the queer antics of fish which would swim to the top of the water, roll on their backs, and perform peculiar antics.

It was discovered recently that all home-brew confiscated during police raids is dumped into the sewer and flows into the Red River. Hundreds of gallons have been poured into the Red River in the past year, some of it 130 per cent proof spirits.

rinks in this event obtained byes. Coming into the eighths, Powers won from McNichol; Tricker from Fairbairn; McKenzie from Smith; Reid from Tolton; Gooderich from Torrance; Roberts from F. Poxon; Jackson from L. Poxon; Stone from McGregor. Taking this event to the semi-finals, Tricker won from Powers; McKenzie from Reid; Roberts from Gooderich; Stone from Jackson. Bringing this competition to the finals, Tricker won from McKenzie; Roberts from Stone. In the final game Roberts won from Stone.

Red and White Event

Going into the eighths, F. Poxon won from McGregor; Fowler from Greenan; Smith from Powers. All the other rinks received byes. Going into the fours, F. Poxon won from Fowler; L. Poxon from Smith; McKibbin from Leitch; McNichol from Torrance. In the semi-finals, L. Poxon won from F. Poxon and McNichol from McKibbin. In the final game McNichol won from L. Poxon.

There were twenty rinks entered in the bonspiel this year, there being ten outside rinks and ten local rinks. Following is a list of the rinks entered: G. Yavis, Drumheller; J. Jackson, of Drumheller; W. McKenzie, Drumheller; H. Roberts, Drumheller; M. Gooderich Acme; J. C. Smith, Acme; W. L. Tolton, Acme; R. Stone, Rockyford; F. Tricker Swallow; M. Powers, Swallow. The following are the Carbon rinks entered: W. Leitch, F. Poxon, L. Poxon, W. McNichol, R. J. Fairbairn, S. F. Torrance, J. J. Greenan, G. F. McGregor, A. F. McKibbin and Sandy Reid.

IN MEMORIAM

Shed a tear for Mary McQueen
Death held for her no terrors,
She lived an old maid
She died an old maid
No runs! No hits! No errors!

PRIMARY SCHOOL REPORT

GRADE IIA—Pauline Schoeppe, Mary Mayers, Annie Lemay, Helen Csepe, Ralph Atkinson, Lucille Lemay, Ellen Hedberg, Annie Shyika, George Moore, Lillian Dixon, Victor Kaehn, Harold Moodie. Absent for tests, Betty Wilson.

GRADE IA—Theresa Mayers, Stanley Gouldie, Norman Wheat, Mabel Nash, Donald Martin, Evelyn Cox, Lena Reid, Marjorie Gouldie.

UNSEEN FOUNDATIONS

Amongst the many forces at work in the building up of the nation is one which has its beginnings at the cradle itself, or to be more accurate, when the coming citizen is in embryo there are being built unseen foundations for his coming life.

The care of the expectant mother of today is a matter of better knowledge, and a truer understanding of the duties of maternity. It is with great pride that England is looking over the situation of her infant health. During the last quarter of the past year there was recorded the lowest infant death rate, namely 45 per 1000 live births. This is the lowest figure in the history of the country.

The rate in 1890 was 153, as it was ten years hence in 1900. Ten years later in 1910 the rate was 105 and in 1920 it had fallen to 80.

It must be pointed out that these parents were prepared by the health teachings in schools, and that when girls who were well instructed in mothercraft became mothers themselves they had a great reverence for, and knowledge of responsibilities which faced them. That there is no more sensitive index of the general well-being of the people than the infant death-rate, is a legitimate inference of all who study vital statistics.

Children are having a better chance in life today because they have better informed mothers. When they go to school they are privileged to have a health teaching along simple lines which makes a permanent physical prosperity.

The unseen foundations are being laid quietly yet effectively by the Red Cross by means of its Free Health Library for mothers, and by the wonderful organization of Junior Red Cross which encircles the globe, and is to be found in any little red schoolhouse by the wayside.

Send to the Red Cross, Civic Bldg., Edmonton, for free health literature.

S. J. GARRETT ELECTED BY ACCLAMATION

Nomination day for Village councillors was on Monday, February 2nd, and this year there was only one aspirant for Village honors, that being Mr. S. J. Garrett, the retiring councillor and mayor of Carbon for the past two years. With no other nominations, Mr. Garrett was elected by acclamation for the three year period.

The members on the Village Council for the year 1931 will be Messrs. S. J. Garrett, L. G. McQuade and Jas. Flaws.

CURLING CLUB HOLDS VERY SUCCESSFUL DANCE

The dance held in the Farmers Exchange hall last Tuesday evening under the auspices of the Carbon Curling Club proved very successful, both from a social and a financial standpoint. In spite of the hard times over \$80 were cleared after all expenses were paid.

During the supper hour the drawing for the player piano, which was being given away, was made and Lawrence Shea of Beiseker was the lucky winner.

WORD RECEIVED FROM CONST. M. MORIARTY

Friends of Const. M. Moriarty received word from him this week and he is still staying around Killarney. "Mike" says that they have been experiencing the worst wet season in the past 60 years and during the past year eighty inches of rain fell in the Killarney district.

In concluding his message to friends Const. Moriarty says "I hate to see all the Russian Grain that is unloaded at the ports here and in Glasgow; I saw nothing else but Russian Grain unloaded at the docks. I hope to be back about the end of March."

CARD OF THANKS

The late Mr. Watkins' last request was to thank the people for the kindness shown to him during his illness.

CARD OF THANKS

Mrs. W. Watkins and nephew wish to thank everyone for their kindness and assistance given during their recent, sad bereavement.

When a Laxative Gripes ---BEWARE!

Severe abdominal pains, griping, after taking a laxative is an indication of unnatural strain that may cause serious injury.

No laxative that causes such discomfort is safe, or necessary. ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, night or morning, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

**ENO'S
FRUIT SALT**

Canadian Citizenship

The question arises more or less frequently in the minds of thoughtful Canadians whether the obtaining of the rights and privileges of citizenship by people of other than British birth has not, in the past and up to this present time, been made entirely too easy and more a matter of form than the vitally important matter of national policy it undoubtedly is.

There can be no escaping the fact that, in these Western Provinces at all events, thousands of people have taken out naturalization papers, thereby becoming Canadian citizens and British subjects, with no higher motive than to secure title to 160 acres of lands to which in all other respects they had become entitled by virtue of having performed the specified settlement and cultivation duties. Hundreds of others have applied for and secured citizenship papers because they found it politic and good business to do so, while hundreds more have taken the same step because of pressure brought to bear upon them to do so in order that they may vote.

Admittedly these are not very high or worthy motives on the part of those thus granted all the citizenship rights and privileges accruing to native-born Canadians and others of British birth. But, on the other hand, is it not a fact that large numbers of men who became Canadian citizens in the first place solely to get title to 160 acres of land have, because of that citizenship and the stake in the future of Canada thus secured, become active, keen and patriotic Canadians of a worthwhile type? Indeed, have not many others, who became naturalized in order that they might vote, through the very fact that they did possess the franchise and had a voice in questions, begin to study national issues, and work for the advancement and welfare of Canada in a manner they would never have done lacking such franchise?

Undoubtedly these things are true, but, nevertheless, the question remains insistent whether even these gratifying developments would not have been further encouraged if the securing of the rights of citizenship had not been quite so easy, a mere matter of form, and the observance of a certain amount of official red tape. And, too, it must also be admitted that, while thousands of people who accepted citizenship in a more or less indifferent and haphazard manner have proved themselves wholly worthy of the rights and privileges thus conferred upon them, other thousands have not done so.

It may now be questioned whether Canada was wise to make 160 acres of land the price of citizenship, notwithstanding that it would probably have been even more unwise to have granted full legal title to homesteads to unnaturalized aliens. However, what is past is past and cannot now be undone. But what of the future?

Valuable as the grant of a free homestead may have been, its value is small to that attaching to Canadian citizenship. That is the fact we must realize. Citizenship is the greatest of all rights, and confers the most valuable and precious privileges any person can enjoy. And in the giving or withholding of citizenship, the State may be deciding its own future for good or ill.

Because this is true, there is much to be said in support of the view that no pressure of any kind should be brought on any person to become a citizen; that the act of naturalization should be a purely voluntary act, free from any persuasion or influence. Further, that the State should exercise its prerogative and confer citizenship only upon those likely to prove worthy of it. Finally, that instead of the act of naturalization being a mere formality, it should be made a very solemn act, surrounded with dignity, and the ceremony of administering the oath of citizenship such as to impress upon the applicant a clear realization of what he is doing, the meaning of the pledges he gives, and the responsibilities he thereby assumes.

It may be necessary to change the present law in order to bring this about. In all probability such change will be necessary. Very well, then; let us change the law. It can at best be little more than a change of form. But if it be made in the right way, and if the privilege of Canadian citizenship be appraised by us at its true value, the whole spirit of the act of naturalization will be changed, and those seeking citizenship will realize that it is a heritage we guard jealously, one we do not confer lightly or merely at a price, but one we deem to be the highest privilege within our power to extend to a fellow-man or woman. Then, and not till then, will the words: "I am a Canadian citizen" hold the full value of Paul's proud boast of old: "Civis Romanus Sum!"

Invents Infant 'Plane

Genoise Claims Speed Of Sixty Miles An Hour

An aeroplane, 66 pounds, which converts a pilot into a "flying man," is the brain child of a young Genoise inventor. It consists of two wings, 18 feet wide, a rudder and elevator, and

a five horsepower motor. The 'plane, which has a small propeller, is fastened to the shoulders and back of the pilot, who wears skis. As the pilot skis along with the assistance of the motor, he gathers enough momentum to take off. The inventor claims a speed of 60 miles an hour for the infant 'plane, which has a parachute large enough to bring both pilot and 'plane safely to earth.

By Acclamation

Captain McGregor MacIntosh, of Salt Spring Island, Conservative, was elected by acclamation, to the British Columbia legislature as representative of the "Islands" in the by-election rendered necessary by the resignation of Col. C. W. Peck, V.C., now a member of the regional pensions board.

Should Cut War Budgets

Advocates Plan For Debtor Nations Of United States To Improve Conditions

Edward N. Hurley, who was a member of the Great War foreign debts commission, said in an address prepared for delivery before the Chicago association of commerce that the 16 debtor nations of the United States should cut their war budgets and the United States should simultaneously reduce their war debts.

He said the debtor nations were formerly the best customers the United States had, and that if this country reduced the war debts the same countries would return to United States markets for goods, causing a profitable resumption in industry and export markets.

He suggested a 30-year plan whereby the total reduction would amount to fifty per cent. of the total war debts due the United States, with but a slight tax increase in the United States.

Magnesia Best for Your Indigestion

Most people who suffer, either occasionally or chronically from gas, sourness and indigestion, have now discontinued disagreeable diets, stomach tonics, medicines and artificial digestants, and instead, take a teaspoonful or four tablets of Bisurated Magnesia after meals with the result that their stomach no longer troubles them. They are able to eat as they please and they enjoy much better health. Those who use Bisurated Magnesia never dread the approach of meal time because they know this wonderful anti-acid and food corrective, which can be obtained from any good drug store, will instantly neutralize the stomach acidity, sweeten the stomach, prevent food fermentation, and make digestion easy. Try this plan yourself, but be certain to get Bisurated Magnesia especially prepared for stomach use.

Jap Aviator Back To Work

Conqueror Of Three Continents Returns To California Cafe

Zensaku Azuma, 35-year-old Japanese aviator and cafe proprietor, of Pasadena, Cal., is back dispensing chop suey after conquering three continents by air.

Azuma told a welcoming crowd of his lone flight across North America, Europe and Asia, of his victorious landing in Tokyo, August 31, 1930, and of the many dinners, some attended by royalty, given in his honor.

Azuma bought a little, open cockpit 'plane with the profits of his cafe. He flew to New York, shipped his 'plane to England and cruised on to Tokyo. He was an enlisted man in the army aviation corps during the Great War.

"If the chop suey business holds up," Azuma said, "I may try a trans-Pacific flight."

Attacked By Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Saskatchewan's Coal Record

In Saskatchewan, Canadian coal dominates the market, the output from Saskatchewan mines in 1929 setting up a new record for the province with 580,189 tons, an increase of 23 per cent. over the previous year.

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Invaluable for sore throat, croup and quinsy.

Railways and Coal

Railways in Canada consumed 5,200,000 tons of Canadian coal in 1929.

Success is sometimes the result of beating the other fellow to it.

for STIFFNESS
Plenty of Minard's well rubbed in soon sets you right. Bathe the sore part with warm water before you start.

**MINARD'S

ACID causes Headaches

When there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet your way out of the trouble!

Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments.

Take a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. Whenever you are taking cold or feel sluggish, weak, constipated, Phillips' Milk of Magnesia has a gentle, laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips for your protection.

Demand For Empire Products

Another Empire Shop Is Opened At Birmingham, England

Another "Empire Shop" was opened at Birmingham recently, the first in England. The first of these shops in the British Isles was opened at Glasgow last year, and William Lunn, M.P., under-secretary for Dominion affairs, said at the opening that 140,000 samples had been sold at the Glasgow shop. The traders in Glasgow had found the demand for Empire products definitely increasing.

Sir Charles Howell Thomas, on behalf of the ministry of agriculture, accepting tenancy of the Birmingham shop, said the public was more and more realizing the wonderful value of Empire products.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Argentina now has more miles of railways than any other Latin American country.

The eagle, in its native haunts, will live to be 200 years old.

Complaint Is Justified

Many Tourists Have Craze For Defacing Beauty Spots

The council of a popular holiday resort in Scotland, who complain of the writing of names and advertisements on the rocks, are not alone, of course, in their grievance, for scribbling seems to be a craze with tourists the world over, says the Herald. The trouble people take in the perpetration of such outrages is remarkable. A few years ago, in Norway, an English visitor went to the labor and expense of obtaining an india-rubber boat, in which he rowed out beneath a certain famous cliff, landed at great risk of his life, climbed a yard or two up the almost perpendicular rock, and painted his initials in big, white letters—just to prove, as he explained, that he had been there. Offensive as they may be, however, such pranks are mild in comparison with other tourist outrages on record—as when an American, being shown over a shrine in Italy, was told a certain lamp had not been allowed to go out for centuries, whereupon he immediately extinguished it, remarking "It's out now."

Suffered From Heart Trouble

Became Weak and Run Down

Mrs. Wm. Diotte, Glensandfield, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

More Attention Must Be Paid By Hog Raisers To Feeding And Marketing In Best Condition

During the past few years Canadian hog producers have been able to congratulate themselves on the vast improvement that has been made in the quality of their hogs and pork products. Packers have been glad to join in acknowledging to the full this improvement. It meant that producers and packers were enabled to supply the demand for fine quality bacon to a great extent each year.

But throughout this whole period it has been evident that much more attention was being paid to type and breeding than to feeding and marketing in the proper condition and at the most desirable weights. It appears impossible for producers to realize that consumer demand is definite, clear-cut and exacting. It will not take a product from the producer simply because that is what he happens to have at the time or that he finds it easiest to supply.

In the pork trade there are two requirements of consumptive demand,

than the percentage required by the trade that absorbs this product, there is a discount on these hogs. When the producer is sending to the market more of the heavier weights, even though not over-finished, than the percentage wanted by the trade using such weights of product, it is the oversupply, not any change in demand, that depresses the price of cuts from hogs of these weights. When, however, the producer adds over-finish to the extent of extreme fatness to an excessive percentage of the heavier weight hogs the result is serious trouble with the consuming trade.

It should thus be abundantly clear why Canadian packers for years have been urging producers to improve their feeding methods and to market hogs at more suitable weights and finish. For several years light weights and lack of finish have been emphasized as undesirable. Now the situation is reversed. Hogs are over-

The one relates to weight of the cuts, the other to quality of the meat. This demand is almost constant. In the export trade there is an almost constant demand for a certain percentage of Wiltshire sides weighing from fifty to fifty-five pounds, another constant percentage for sides of fifty-five to sixty pounds, and again another constant percentage for sides of sixty to sixty-five pounds, and so on. In the domestic market certain percentages of the total product of hams or bacon of specified weights are definitely required. A percentage of the trade requires ten to twelve pound hams, another percentage twelve to fourteen pounds, etc. Similar weights apply to other cuts.

In the same way there is definite demand as to the quality of meat and the amount of fat. The bulk of the trade wants lean, but not too lean, meat. Another section requires a somewhat fatter, but not too fat, meat. To disregard this demand brings heavy penalties from the consumer.

It appears difficult for the producer to grasp these facts or to apply them to his production methods. The result is a varying supply with which to meet a constant demand. The producer is inclined to view it as varying demand and to complain that he never knows what the market does want. But the situation is very simple. Demand is constant. When the producer is sending to market more light and lean hogs

fat and too big a percentage are above the most desired weights. This has made necessary a revision of price differentials between the grades. If the evil continues further steps will have to be taken to correct it. The necessity is not due to any change in consumer demand, but to change in produced supply. The objective is to bring the supply back to the requirements of the demand, just as it was when too many hogs were light and under-finished.

The select and bacon grades of hogs in Canada were planned to take in the full range of desirable weights and quality. But it was recognized that the two hundred pound weight was standard because the bulk of demand centred on the cuts from this weight of hog. So, too, certain definite standards of finish are called for. If hogs are fed to normal weights the average variations within the litters give a fair distribution of weights of cuts according to demand. But when, as now, weights are being thrown out of balance through excessive feeding, the large percentage of the heavier and fat cuts resulting is creating very serious difficulties.

The reason for such variations in marketing weights of hogs is, of course, expediency in feeding. But is this a reasonable reason? The producer has been inclined to believe it is, and if feed supplies were low that he was justified in marketing at light weights, and if feed were plentiful he had a right to push his hogs to top weights. But surely the trend of the dramatic events of the past year must give us all pause. If any considerable volume of Canadian bacon had to find a market in Britain the present average quality would render much of it unmarketable. It is with difficulty, even though aided by low supplies, that it is being marketed at home.

Is it, then, unreasonable to insist that producers must definitely turn away from slipshod expediency to the practice of sound production methods? We are low in hog numbers, but it is shortsighted policy to spoil the few that we have through trying to make three hogs eat the feed that four should consume.

Named Auditor

Charles Blake Gordon, appointed Auditor of Disbursements, Canadian Pacific Railway, from January 1, 1931, entered the service of the railway in 1903 as stenographer in the vice-president's office. In the same year he was appointed secretary to the president, then Sir Thomas Shaughnessy, with whom he remained till 1910 when he was appointed secretary-treasurer of the Kettle Valley Railway Company in British Columbia. From 1914 to 1919 he was on military service and in 1919 was appointed treasurer of the Kettle Valley Railway, afterwards becoming comptroller of the line. He left that position on promotion to his present post at the beginning of the year.

Predicts Science Will End Depression

Professor Believes Some New Discovery Will Boost Business

It was predicted at a science symposium, in New York, sponsored by the American Institute, that science will end the current business depression by developing some new product as widely used as the radio or the automobile.

It may be, Dr. H. H. Sheldon, professor of physics at New York University, said, ultra-violet light as a substitute for sunlight indoors, artificial weather, aviation safety devices, electric clocks or automatic refrigeration.

Commercialization of scientific discoveries has ended depression in the past by creating new mass-production industries that gave jobs to the unemployed, said Dr. Sheldon, citing the radio, automobile, telephone, bicycle, electric dynamo and clipper ship.

An Incentive To Thrift

New French Clock Runs If Money Is Deposited Daily

An ingenious incentive to thrift—a quality for which the French people are justly famous—is provided by a device recently placed on the market. It is a clock, which is at the same time a savings bank. Unless one feeds it a franc, or two francs, or three francs, as the case may be, each day, it will not run. The owner of the clock if he does not wish the openly accusing face of the timepiece to stare at him heartlessly, motionless, and silently, must therefore make his savings deposit as regularly as he would wind his alarm clock. In an age when time payments can be made on almost anything, the savings clock will probably assist many people in paying their instalments promptly.

"I can't eat this fish. Send for the manager."
"It's no use. He won't eat it either."

Canada Has Stepped Up To Second Place Among Gold Producers Of The World

May Use Bay Route

Railways Of Continent Could Be Granted Running Rights By Government

If the government grants them privileges, the Hudson Bay Railway line is open to the railways of the continent, J. A. Campbell, K.C., said in an address at The Pas. Mr. Campbell, former member of parliament, was noted as a strong advocate of the bay route, via Churchill, when the route was first proposed.

Canadian National Railways, he said, was operating the line for the time being, but, if the government desired they could give any railway in Canada or the United States running rights over the line to Hudson Bay. The Canadian Pacific Railway, he thought, would likely seek running rights as soon as practical testing of the route is completed.

(By Eva A. Tingey.) 7308

DIGNIFIED AND LOVELY

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Matrons, consider well this beautiful dress, for it has many features which may serve you admirably.

It is wrap over, new, delightful in cut and slimming—the pretty lines of the skirt being carried on into the bodice by means of the graceful scarf.

Various fascinating silks, such as marocain, crepe de chine, satin, etc., can be used for the dress, while black, deep red, wine and currant shades, green, grey, soft blues, beige, etc., are color suggestions.

With black, a camelia or two, either white or pink will be a most attractive relief tucked into the knot of the bow. The belt buckle can be of brass. With colors, colored stones give a charming touch. Turquoises, also rubies are very modish.

This pattern may be obtained in sizes 16 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Among the most keenly debated questions of the present time is the supply of gold available for monetary use and the probability or the reverse of that supply being maintained.

In this subject Canada has a double interest, first, as a producer of some importance and, secondly, as a trading nation, whose aggregate in proportion to population is the second highest in the world, and whose people are necessarily intimately concerned with whatever is fundamental to world prosperity. In this connection much argument has been expended on the necessity for a more equitable distribution and employment of the existing stocks of gold. Along with this, however, has come a note of real actual shortage in the gold supply itself, mainly caused by the anticipation of an early reduction in the level of South Africa's output, the mainstay of the world in that respect during the last quarter of a century. For the total gold output of all the remaining sources of supply in 1929 when contrasted with the situation in 1905, showed a drop of nearly thirty per cent.

In the December issue of Natural Resources, the monthly publication of the Dominion Department of the Interior, the trend of world gold production is reviewed, and it is noted as of special interest from the Canadian standpoint that in the writings of almost all students of the gold situation "little or no importance has been attached to Canada's rising output. It is true," the writer admits, "that the Dominion's production has never bulked largely in the world's total output, but it has grown, and is continuing to grow, substantially. With gold being produced in larger quantities either from gold properties or from huge ore bodies in which gold is associated with other metals, it may well be that Canadian resources are destined to play a much more prominent part than has yet been foreseen, in offsetting the expected depletion of the South African goldfields and the threatened embarrassment of the world's monetary systems."

It is, therefore, with all the greater interest we learn from an editorial in the Quebec Chronicle-Telegraph that in 1930 Canada produced more gold than any other country in the world except South Africa. It stepped up from third place to second place as a gold producer among the nations of the world. In so doing it changed places with the United States. The Northern Miner estimates Canada's yield last year at over \$43,000,000, and the yield of the United States at \$41,000,000. For some years past, the American production has been gradually dropping and Canada's production gradually increasing. Not a single Ontario gold mine reduced or passed its dividend last year. One gold mine initiated dividends. One declared a 30 per cent. bonus. One declared an extra dividend. And still another resumed dividends after a lapse of two years.

Gold mining is thus an industry, the Chronicle-Telegraph continues, that, during 1930, grew in prosperity, contrary to the trend of most other industries. Incidentally, several of our most important gold mines are finding bodies of rich ore at unexpected depths. Developments in the new Bannockburn field seem to point to the beginning of a new and greater era in gold production. In the meantime, prices of base metals show signs of stabilization, so that we may be on the verge of an improvement in nickel, copper, lead and zinc mining. There is even some hope for silver. The action of Mr. E. W. Beatty, president of the Canadian Pacific Railway, in taking the place of Lord Melchett on the board of the International Nickel Company is just another sign of the times. Those leading Canadians who have the most reliable sources of information show a reassuring confidence in the natural resources of the Dominion and their progressive development.

WORLD HAPPENINGS BRIEFLY TOLD

France is beginning to feel the effects of the world depression. Declining revenues are likely to result in a budget deficit of 40 million dollars.

Russia, Germany, Italy and France all have a genuine desire for peace, Lord Cecil declared in the House of Lords during a disarmament debate.

A. F. Ewing, K.C., Edmonton, has been named trial division judge of the Supreme Court of Alberta, replacing Mr. Justice Walsh, elevated to the Appellate division.

Frederick Martin Hale, 66, inventor of the Hale bomb with which the first Zeppelin was destroyed and the first U-boat sunk during the Great War, died in London, England, on Feb. 2.

British manufacturers are realizing that they must vary their products to Canadian tastes, says Sir William Clark, British trade commissioner for Canada.

Revised figures of the British Columbia salmon pack for 1930 give a total of 2,221,819 cases or an increase of more than \$20,000 over the year before.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides.

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say.

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good that is in it."—Mrs. S. A. Solomon.

"P.S.—You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

All-Canadian Radio Program

"Canada on Parade" is to be the title of a distinctly Canadian radio program which is being arranged for Dominion-wide broadcast within a few months. Putting on the air the best of Canadian musical and acting talent, and nationally prominent public officials giving brief historical and inspirational addresses, the sponsors say they hope to emphasize the vastness and potential greatness of Canada.

Belfast will have double-deck buses.

Rheumatism Routed. Rapid Relief.

Mr. Arthur Padgett, of Barnsley, writes:—"For the last few years I have suffered with rheumatism, also severe attacks of indigestion. I suffered great pain in the back and tried various remedies without relief. A friend advised me to try at once Carter's Little Liver Pills—this I did and received immediate relief. I am a miner, and I strongly recommend your valuable pills to all sufferers of rheumatism, indigestion and constipation."

Take Carter's Little Liver Pills for sick headache and indigestion. All druggists 25c and 75c red pkgs.

Help yourself to PARKER HOUSE ROLLS

Try this Recipe

- | | |
|----------------------|-----------------------------------|
| 1 cup scalded milk | 1 saltspoon salt |
| 2 tablespoons butter | 1/2 Royal Yeast Cake dissolved in |
| 1 tablespoon sugar | 1/2 cup lukewarm water |

To the scalded milk add the butter, sugar and salt. Allow it to cool until lukewarm and then add dissolved yeast and 1 1/2 cups flour. Stir well and let stand in moderately warm place overnight. In the morning, add enough flour to knead, and let rise until about double in bulk, then roll out 1/2 inch thick. Cut with biscuit cutter and brush each piece with melted butter, crease through the center and fold over. Let rise again until double in bulk and bake for about 25 minutes in moderate oven. Above is sufficient for about ten rolls.

If you bake at home, write to Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, for the free Royal Yeast Cake Book. It contains tested recipes for Lemon Buns, French Tea Ring, Dinner Rolls and many other delightful varieties of bread.

Our new free booklet "The Royal Road to Better Health" suggests many pleasant ways to take Royal Yeast Cakes and describes how this simple practice will improve your health. Send for it.

ROYAL Yeast Cakes

make all breads taste better, look better and keep better. For over 50 years they have been the accepted standard of quality wherever dry yeast is used in home baking. Keep a supply handy. Each cake is sealed in waxed paper. They will keep for months.

SUNDAY SCHOOL LESSON

FEBRUARY 15

JESUS THE FRIEND OF SINNERS

Golden Text: "Faithful is the saying, and worthy of all acceptance, that Christ Jesus came into the world to save sinners."—1 Timothy 1.15.

Lesson: Luke 7.

Devotional Reading: Romans 5.1-8.

Explanations and Comments

The Sinful Woman's Deed, verses 36-38.—One day Simon the Pharisee invited Jesus to dine with him, and seemed to think this honor enough for the carpenter's Son, for he failed to show Him the civilities due an honored guest. "We are still in that epoch of transition when the rupture between our Lord and the Pharisees, although already far advanced, was not yet complete. A Pharisee could still invite Him without difficulty. It has been supposed that this invitation was given with a hostile intention. But this Pharisee's own reflection, verse 39, shows he was hesitating between the holy impression which Jesus made upon him and the antipathy which his caste felt against Him."—Godet.

During the meal a woman of the city, a sinner, entered uninvited, with an alabaster cruse of ointment. Jesus was reclining on a couch in the customary manner at a feast. His head toward the table before Him and His bare feet stretched out behind Him. His sandals having been removed. The woman approached and stood behind Him. Was it to lay bare her soul, to tell Him of her self-abasement, her penitence, devotion, and love? By no means. As far as we know, she spoke not a word, but let her deed show her gratitude for the forgiveness she had already received, or was confident she would receive. She wet His feet with her tears, wiped them with her hair, kissed them, and anointed them with precious ointment. "To appreciate this act, we must remember that it was one of the greatest humiliations for a woman to be seen with her hair disheveled. Similar acts of respect were sometimes, but rarely, paid to rabbis. A man once came to kiss the feet of Rabbi Jonathan, because he had induced filial reverence in his son.

The Pharisee's Criticism, verse 39.—Simon was scandalized at the woman's act and the Lord's acceptance of it. Evidently Jesus was no prophet, Simon said to himself, or He would have detected the truth about the woman and would have scorned her.

The Pharisee's Lesson, verses 40-46.—At once Jesus showed Simon that He not only knew the woman's history but that He even read Simon's thoughts. "Simon I have somewhat to say unto thee," thus Jesus arrested his attention. And then He told him His parable of the "Two Debtors": one of them owed five hundred shillings and the other fifty shillings, but as neither of them had wherewith to pay, the lender forgave them both. "Which of them, therefore, will love him most?" Jesus questioned, and Simon answered, contemptuously, carelessly certainly, with no thought of the bearing of the question, "He, I suppose, to whom he forgave the most." "Thou hast rightly judged," Jesus said, and then turning toward the woman He questioned, "Seest thou this woman?"

Then Jesus reminded Simon of his omission of the customary acts of courtesy due a guest—the water for His feet, the kiss of greeting, the oil for anointing—and contrasted these with the lavishness of the woman's offerings. It was evident that, unlike the woman, Simon had no consciousness of sin at all and no repentance, or he would have shown greater love.

The Relation Of Forgiveness and Love, verses 47, 48.—"Wherefore I say unto thee, her sins, which are many, are forgiven; for she loved much." There are two possible interpretations of these words. One is that her love won the forgiveness

This was Coleridge's thought when he wrote:

"She sat and wept, and with her untressed hair
 Still wiped the feet she was so blest to touch;
 And He wiped off the soiling of despair
 From her sweet soul, because she loved so much."

Persian Balm is magical in creating alluring complexions. A little gentle rubbing and your skin is invigorated and touched with true beauty of youth. Charming fragrance. Delightful to use. Cools and caresses the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

Big Attendance Expected

Eleven countries have officially accepted the invitation to participate in the World's Grain Exhibition and Conference, which is to be held at Regina, July 25 to August 6, 1932; namely, Italy, Peru, Yugo-Slavia, Guatemala, New Zealand, Czechoslovakia, Netherlands, Belgium, Poland, Siam and India. It is expected that fully 50 countries will have representatives present when the conference and exhibition opens.

British Boys For Canada

Liverpool Education Authority To Send Out Forty Youths To Dominion

The statement that the provincial governments of Canada had informed the British authorities of their ability to take 1,300 boys from Great Britain in the coming year, and would guarantee their placement on approved farms, was made at a meeting of the Liverpool education authority.

The Liverpool authority decided to send 40 boys to Canada. Presumably the announcement was an outcome of the recent conference of provincial representatives at Ottawa, but representatives in London, England, of the various provincial governments appeared recently to have received no instructions in the matter.

Labor Troubles Across the Line

Says Unemployment in United States Is Growing Worse

Despite the strenuous efforts of the president, Col. Woods and others to reduce unemployment, the situation, according to William Green, president of the American Federation of Labor, grows worse.

"Unemployment," said Mr. Green today, "has increased since December, and 5,700,000 wage earners in the United States were out of work in the first part of January. This compares with 5,500,000 in December, and these figures do not include farm-labor or office workers."

Result Is Encouraging

Disarmament Conference Is Making Progress With Its Work

There is encouragement to be found in the results of the Disarmament Commission. The work has been going on for four years and more, and up till quite recently agreement did not seem probable on anything like such a scale as has now been achieved. A framework at least has been provided, and into that framework the World Disarmament Conference, when it meets, must build a more secure and substantial edifice. Only those who expect results far more rapid than the present outlook of the world permits need be depressed by the Commission's results.

CHINA SECURES WHEAT SUPPLIES FROM AUSTRALIA

Tokyo, Japan.—China has become a large buyer of wheat and flour and will continue a very important market for wheat in the future, according to Hon. Herbert M. Marler, Canadian minister to Japan. Mr. Marler has just returned from an extended visit to China where he made a careful investigation of that country's trade possibilities.

At present, the minister said, China is purchasing large quantities of wheat from Australia which, owing to the decline in exchange rates, Australians will be able to sell as much as \$4 a short ton under Canadian prices.

This fact, Mr. Marler added, eliminates every possibility of Canada and the United States competing with Australia in the Chinese market during the current season.

Mr. Marler is greatly concerned over the danger threatening China from decline of silver prices, and expressed the opinion that unless remedial measures are quickly found, China will soon cease to exist as a market for foreign goods.

Ottawa, Ont.—Reports as to the prospects of selling Canadian wheat to China have been made by Hon. Herbert Marler, Canadian minister to Japan, who recently visited China. The nature of these reports, which were made to the government here, has not been announced. However, recent communications from Canadian trade commissioners in the Orient are understood to have contained much the same information as that in Mr. Marler's interview in Tokyo.

Australia is in a position to sell wheat more cheaply to China than the prevailing prices for the Canadian product. Of course, Australian wheat sold to China is off the market, and will not compete with Canadian wheat in other countries, so that the fact Chinese are buying wheat may help Canada indirectly.

Trade with the Orient was one of the subjects dealt with by Premier Bennett in his speech at Regina a month ago. His remarks, in part, were: "We will by all means in our power strive to secure a great market in the Orient for our products, and I have no doubt but we will succeed. Our minister to Japan, Hon. H. M. Marler, is, I hope, at this very hour on his way to China to discuss with the government of that great country the purchase of millions of bushels of our wheat."

Airplane Owners Sued

Ontario Woman Enters Action For Alleged Negligence

London, Ont.—The first action at law in Canada in which negligence in driving an aeroplane is alleged was called in the Court of Assizes of Middlesex County.

The accident occurred on July 27, 1930. The aeroplane, belonging to Roy and Douglas Macklin and Harry Peterson, of Sarnia, was making a landing at Port Frank when, it is alleged, its wing struck Mrs. Mary McGillivray, of Parkhill, as she was bathing in the lake.

She contends the owners of the plane were negligent in attempting to make a landing in the midst of a crowd of people and claims \$10,000.

Lumber For New Zealand

Extension Of Credit For Stricken Areas Is Advocated

Toronto, Ont.—In order that New Zealand might be enabled to purchase Canadian lumber and building materials for the reconstruction of areas devastated by the recent earthquake, extension of credits will be urged on the Dominion Government by the Canadian Lumbermen's Association.

A resolution naming a committee to lay this request before the government was passed recently by the association in convention here. It carried unanimously without discussion.

W. N. U. 1876

Canadian Is Candidate

Brig.-Gen. Critchley Enters By-Election Contest In Britain

London, England.—Although Lord Beaverbrook and his Empire crusaders have had nothing to say regarding the sudden withdrawal of their candidate, Paul Springman, from the by-election fight of East Islington, they have soon filled his place.

Brig.-General Alfred C. Critchley, formerly of Calgary, Alta., has been chosen as the candidate of the crusaders and of Lord Rothermere's United Empire party. With the announcement of his candidature Conservative hopes of a united Conservative vote were shattered.

Brig.-General Critchley was born in Calgary 40 years ago. He served with the First Canadian Division in France, going over as adjutant of the Strathcona Horse. He was later with the general staff. After the war, he was engaged in immigration work in Mexico and Central America. The general is vice-president of the British Portland Cement Association and is on the boards of other companies.

Kingston Welcomes Royal Travellers

Thousands Crowd Docks To Greet Prince Of Wales and Prince George

Kingston, Jamaica.—Greeted by an ovation from 50,000 persons who crowded the docks, the Prince of Wales and his brother, Prince George, stopped over here on February 4, on their voyage to South America.

Despite the busy day which awaited him on this island, the heir to the British throne found time to open a new golf course at Constant Spring, six miles from here, and to attend a polo match.

In the evening the royal guests were guests of honor at a reception given by Governor Sir R. E. Stubbs and Lady Stubbs at Government House. There they met the high dignitaries of the island.

At the end of the official welcome, the Prince of Wales pleased the crowd by making a short speech. He said that brighter days were ahead and told the Jamaicans to face the future with courage.

St. Godard Wins Dog Derby

Captures First Prize and Gold Challenge Cup

Ottawa.—Emile St. Godard, Le Pas, Man., repeated his victory of last year in Ottawa's international dog sled derby. The young "monarch of mush" withstood a gruelling stretch drive by his fellow Manitoban, "Shorty" Russick, Cranberry Portage, to capture the \$1,000 first prize money and the Chateau Laurier gold challenge cup.

The veteran from Cranberry Portage drove over the final 33½ mile leg of the 100-mile race in three hours, nine minutes and 44 seconds. This was three minutes and three seconds better than St. Godard's time; but the lead piled up by the latter in the two previous heats was enough to give him victory.

St. Godard's elapsed time for the 100-mile derby route was nine hours, 18 minutes and 40 seconds. Russick required 9:22:30.

May Consider Naval Pact

Britain's Decision Depends On Action Of France and Italy

London, England.—Rt. Hon. A. V. Alexander, First Lord of the Admiralty, declared in the House of Commons, that unless France and Italy adhere to the principles of limitation of naval armaments Great Britain will have to reconsider her present construction program.

The British commonwealth, he said, was now building 46,145 tons in warships of which 2,656 tons were destined for Canada. France was building approximately 100,684 tons, and Italy 100,777 tons.

Must Pay Own Fare

Mexico City.—Foreigners deported from Mexico would have to pay their own fare home, under the terms of a proposal before the national immigration conference meeting here. Those not financially able to do so would be placed in a penal colony where they could earn the necessary funds.

DEATH OF FAMOUS DANCER

Anna Pavlova, famous Russian ballerina and creator of "The Death of the Swan" dance, died recently at The Hague following an attack of pleurisy.

War Claims Adjustment

Money Is Found To Be Owed To German Prince

Ottawa, Ont.—As a result of the finding of the Anglo-German mixed arbitral tribunal, which is settling claims with respect to German property, arising out of the war, Canada has credited the German clearing office with the sum of \$69,183. The credit is authorized in connection with real estate transactions involving Prince Von Hatzfeldt, a German nobleman, and Alvo Von Alvensleben, arising out of the sale of property on L'Isle Island in the mouth of the Fraser River in British Columbia. The department of the secretary of state here, in confirming the credit, mentioned that the sum would be set off against some three million dollars due Canadian citizens in connection with war claims against Germany. Cables from London state that the tribunal finds the German prince entitled to claim back payments paid by him on the property.

Slot Machines Banned

Winnipeg, Man.—A slot machine for vending candy was a gambling device and the premises in which it was used came within the category of a common gaming house, Judge Graham ruled in court in convicting a store proprietor of keeping a gaming house. This is the first of many similar cases to be given airing in court here, but the first one in which the magistrate has taken such a definite stand.

Reasoned Optimism

New Vistas and Opportunities For Surveyors and Explorers In Canada

Ottawa, Ont.—Reasoned optimism and not pessimism should be the dominant note of public feeling in Canada, Sir George Garneau, of Quebec, told the Dominion Land Surveyors at their annual luncheon here. Sir George was the chief speaker, and gave an historical sketch of the progress of exploration and surveying in Canada from Champlain's time to the present.

Hon. T. G. Murphy, Minister of the Interior, said he was loath to think the Department of Interior had fulfilled its usefulness now that the natural resources had been returned to the prairie provinces. The surveyors would find new vistas for activity and opportunity of continued service for Canada in opening up the districts north of these provinces. W. Maxwell, president of the Association of Surveyors, was chairman.

The Radio Situation

Department Of Justice Investigating Legal Aspects In Respect To Quebec

Ottawa, Ont.—Legal aspects of the radio situation in Canada, with particular reference to Quebec province, are being placed before the Department of Justice for consideration, announcement to this effect was made here.

So far the Dominion Government has not received a copy of the questions which the Taschereau administration is placing before the Quebec courts respecting the claims of the Quebec Government for radio control in that province. When these questions are received, it was stated, they will be considered by the Department of Justice, and a decision will be made as to whether or not the Dominion authorities will be represented at the hearing, which is being initiated in Quebec.

Faces Breakdown

Premier Ramsay MacDonald Advised To Take Complete Rest

London, England.—Prime Minister Ramsay MacDonald, it is reported, has been advised by his doctors to take a complete rest for a few days to avoid a breakdown from overwork.

Apart from a holiday at Lossiemouth, his native place, in 1929, and a few days' rest last summer, the prime minister has been continuously at work since the Labor Government took office on June 8, 1929.

POPULAR BRITISH SCREEN STAR

Miss Adrienne Allen, popular young British screen star and the wife of Raymond Massey, the well-known Canadian actor and producer on the London stage and the brother of the Hon. Vincent Massey, the former Canadian minister to Washington, who, with her husband, is visiting Canada. Miss Allen won overnight fame in her performance in "Loose Ends," and is shortly to appear in other productions. Her husband also is said to be turning to the screen.

NEW ZEALAND 'QUAKE CAUSES GREAT SUFFERING

Auckland, N.Z.—As details of the story of Tuesday's, February 3, 'quake disaster in the Hawke Bay region unfolded today, February 5, New Zealand appeared for the first time to realize the full import of the terrible tragedy.

A dense shadow of death and suffering hovered above the stricken region, but against this dark background stood out deeds of splendid heroism and devotion. Into the dark desolation of the area so suddenly overwhelmed strode doctors and nurses by the dozen, bluejackets by the score, and relief of all manner.

A general order was issued demanding within two days the evacuation of Napier, capital of Hawke Bay province, and centre of the 'quake. Authorities feared an outbreak of some terrible disease if survivors remained in the once busy seaport town. Arrangements had already been made to evacuate 5,000 women and children to Palmerston, north of Napier.

Messages placed the dead at Hastings between 80 and 100, and 21 identified. Napier had 48 identified dead and scores of bodies lay unclaimed. At least 1,000 were injured, some critically, and other towns in the province were yet to be heard from.

The British cruisers "Dunedin" and "Diomedes" arrived at Napier and Commodore Blake immediately took charge of relief measures. An intercepted message from Blake to the "Dunedin," anchored some distance off shore owing to the virtual destruction of Hawke Bay harbor, requested an immediate store of explosives, indicating the commodore planned to blow up all standing buildings to check the advance of flames.

Fire still raged in Napier and Hastings, licking through the ruins of the broken cities while firemen could only watch, helpless because of shattered water mains. The steamship "Taranaki" sailed from Napier for Auckland with refugees, and the "Northumberland" was expected to do likewise.

Napier was a scene of utter desolation. Hardly a single structure remained erect. The death toll mounted steadily as rescue workers tore into the debris, finding body after body. It was expected several days would elapse before the exact number of deaths could be known.

Several residents of Napier declared that for two days prior to the 'quake an exceptionally heavy sea was running for no apparent reason. The first shock was preceded by sudden roaring and grinding sounds. Then, it seemed the whole earth heaved convulsively, buildings groaned and bent under the strain, then crashed down in clouds of dust.

People rushing from collapsing buildings were trapped by falling walls. Others were trapped within and, if they escaped the quick death of the tumbling walls and roofs, perished in the subsequent flames. The tremors continued throughout the day and night.

Napier was unanimous in its praise for the officers and crew of the British sloop "Veronica," anchored in the harbor when the 'quake occurred. Commander H. L. Morgan and his men went ashore immediately and started relief work. Many amputations and operations were made without the use of anaesthetics owing to lack of supplies.

Napier looked as if it had been bombarded by heavy artillery. Streets were piled high with bricks and rubbish that once composed fine buildings. Outside the business centre the damage was severe, but not quite so extensive. Landslides destroyed many beautiful homes. Railroads were crippled. Bridges buckled like tinfoil.

The greatest toll was claimed at Napier Technical College. At least 20 boys and girls were killed when this building collapsed. Several boys, returning to save a group of trapped girls, were crushed when a subsequent 'quake tumbled the walls.

Death toll at the nurses' home of the Napier hospital was placed unofficially at 22. Night nurses were sleeping and few escaped. Of those who did, many were severely injured.

EDOUARD J. ROULEAU,
Editor and Publisher

**PREMIER BENNETT
NOW ORATES
MORE MODERATELY**

The Ottawa Citizen, one of the Sou-
tham string of newspapers, says:

Last Summer Mr. Bennett went from
coast to coast and held forth on half
a hundred platforms. His speeches then
were models of cocksureness, of self-
assurance, of sanguninity concerning
the rightness of the things advocated.
He had looked into the situation and

he had diagnosed it unerringly. The
country suffered from the pall of nine
years of Liberalism and its supine be-
lief in moderate or low tariffs. That,
and that only, was the cause of the
nations ills.

Mr. Bennett as we have suggested,
uttered these conclusions with an ex-
traordinary positiveness. He spoke with
tremendous conviction in his heart.
The policies he expounded were couch-
ed in terms of burning faith. They
were unimpeachable; they were as the
laws of the Medes and Persians.

That was six months ago. The mir-
acle man has been in office for four
months. He has held an emergency
session, as he promised, to raise the
tariff—and to provide every man with
a job. He has been out West again.
He has seen things with his own eyes.
And what he has seen has seemingly
chastened him. The magic has not
worked. Europe and even Britain are
recalcitrant. The domestic situation
grows worse. Unemployment spreads.
The farmers in the west face a crisis.

In the speeches lately uttered, this
change of mood is reflected. Mr. Ben-
nett still orates with that innate blith-
ness of his. Nevertheless, he appears
to be troubled. Things are not what
they seemed. He talks more guardedly.
He still prophesies and promises, but
with far greater caution. He no longer
speaks of cutting off all manufactured
imports, of blasting a way into foreign
markets, of performing wonders over-
night. It is, we submit, a different Mr.
Bennett that is with us.

SEE THE POINT?

A hen is not supposed to have
Much common sense or tact.

Yet every time she lays an egg,
She cackles forth the fact.
A rooster hasn't got a lot
Of intellect to show,
But none the less most roosters have
Enough good sense to crow.
The mule, the most despised of beasts
Has a persistent way,
Of letting folks know he's around
By his insistent bray.
The busy little bees they buzz,
Bulls bellow, the cows moo,
The watchdogs bark, the ganders
quack,
And doves and pigeons coo.
The peacock spreads his tail and
squawks.
Pigs squeal and robins sing,
And even serpents know enough
To hiss before they sting.
But man, the greatest masterpiece
That nature could devise,
Will often stop and hesitate
Before he'll advertise.

If I were a bear,
And a big bear, too,
I shouldn't much care
If it froze or snow—

If I were equip
'Dlike the walrus is,
I'd not give a rip
If it snow or frizz.

If I could grow hair
Like the raccoon does,
Oh, I wouldn't stir
Though it snowed or frizz.

If I, like the moose,
Were quite warm though nude,
I would be quite spruce
When it fruz or snowed.

Are You Satisfied With Your Business ?

MOST MERCHANTS ARE FINDING BUSINESS UNUS-
UALLY QUIET JUST NOW. SOME CONSIDER THAT
A REASON FOR CUTTING DOWN THEIR ADVERTIS-
ING SPACE. JUST THE OPPOSITE SHOULD BE THE
CASE.

A MERCHANT WHO BUILT UP ONE OF THE GREAT-
EST MODERN DEPARTMENT STORES ONCE SAID:
'WHEN TIMES ARE GOOD IT IS EASY TO SELL THE
GOODS AND IT ISN'T NECESSARY TO ADVERTISE SO
MUCH, BUT WHEN TIMES ARE DULL ONE HAS TO
GO AFTER THE BUSINESS AND I MAKE A BIG IN-
CREASE IN MY ADVERTISING.'

MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak I could not do my work because of pains all the way up my legs at the back. I also had headaches and got very little sleep. I took Lydia E. Pinkham's Vegetable Compound, and soon I was able to get up and do my work. I have taken three bottles and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."

Mrs. F. STATTON, Box 220, Mitchell, Ont.

THE DUSTY HIGHWAY

— BY —
CHRISTINE WHITING
PARMENTER

Copyright 1929

CHAPTER X.—Continued.

Gay turned from the window, her throat aching with an intolerable pain. The lightning was intermittent now, and the thunder merely a distant growl. She went into her dusty kitchen and heated milk for baby Nick—gave Sonny his supper, and leaving the soiled dishes where they were, put both tired little boys to bed.

"Me wants Daddy," said Sonny sleepily, as she tucked him in. "Me wants Daddy—tebbly."

Gay kissed him, and held him close.

"Mother wants Daddy, too, little boy," she said gently. "When you wake up he'll surely be here. Now go right to sleep. Think how glad Daddy'll be to see us in the morning!"

She went into the next room, and for a long time busied herself with unimportant things, because she dreaded to go to the lonely rooms below. But at last she braved them, and an hour slipped by while she washed the dishes, and cleared away the remains of Nick's hasty meal. She tried to eat something herself, but the food choked her. It was still raining, the shower having settled into a steady downpour that threatened to last all night. She swept the kitchen at last, and dusted the living-room and hall, her ears alert for the longed-for whirr of an automobile; but it did not come.

"I hope Nick took an overcoat," she thought aloud. "He's so careless sometimes, and it was warm this morning . . . I do hope they're almost home . . . It must be horrible driving a car in such a rain . . . I wonder if they took chains . . . This mud will make slippery going. . . . I hope he won't drive too fast. . . . It's queer they're so late . . . perhaps—perhaps there's an accident. . . ."

She thrust back the thought in horror; but as such thoughts will, it kept returning, just as her steps returned to the window, although she could not see beyond the glass. At last, in an effort to calm herself, she tried to read, but the house seemed suddenly alive with noises; creaking boards that seemed like stealthy footsteps—branches slapping against the window panes, and occasionally a blind slammed in the wind that was rising fast.

Nine o'clock seemed midnight to her taut nerves. It came and passed, as did ten, and then eleven. Gay almost wished that her tired babies would awake and demand attention. Anything would be better than this solitude.

It was then that a sharp rap on the old brass knocker startled her. She ran to the door, but her hope that it might be Nick was dashed when she saw James Halliday standing on the porch. In the dim light his face looked grey and drawn, and a sickening fear swept over her that he had brought bad news. Then he said:

"Have you heard from your husband, Mrs. Hastings?"

He stepped inside, laying his wet hat upon a chair, while Gay led the way into the living-room, and sank down weakly. That moment of fear had wrought havoc with her newly mended nerves.

"No," she answered. "He doesn't know I'm here. He wasn't expecting us till Wednesday; but we had a chance to come to-day by automobile, and it seemed best. Have you heard nothing, Mr. Halliday?"

He smiled grimly.

"I, too, was away, you know, and not expected until morning. We seem to be in the same box. Did you by any chance know anything about this trip?"

Then he hadn't known! No, thought Gay, they were not in the same box. And yet. . . .

"Why, yes," she answered, pulling herself together. "Mr. Hastings telephoned me Friday night. He'd been dining with Mrs. Halliday, and said she expected some friends for the week-end, and wanted to take them to Mason's Falls, I thought that she wanted someone to drive the new car, and asked Nick to do it; but—

but I understand from Julie Nipps that—that they went—alone."

It was the hardest thing that Gay had ever done, to face James Halliday then. But she did it, lifting her eyes honestly to his in a glance before which his own eyes dropped.

"I see," he said shortly, and arose, walking to the window and peering out into the night. He glanced at his watch, and coming back sat down.

"The storm has probably delayed them," he observed, "and since they don't know we're here and will send no message, there is nothing to do but wait. Even then, I don't see how they can be much longer. Are you alone?"

"With only the children, but—but I shan't be nervous if they come soon."

He said, after a thoughtful moment: "I'm sorry, but I sent Julie home for the night when I returned. She'd been at the house all day, so I told her to go. If I'd realized that you were alone I would have sent her here."

It came to Gay in a surprising flash, that in spite of James Halliday's cynical mouth and hateful stories, he was really kind. He had come from his mother's funeral to find only an empty house, yet he was thinking not of himself, but of her. She looked up gratefully to find him brushing a weary hand across his eyes.

"You mustn't worry about me," she told him. "I'll go up pretty soon and sit with the babies. They're company, even if they're asleep. You ought to go home to bed, Mr. Halliday. You've been through so much today."

He drew a quick breath, as if surprised at her sympathy.

"Thank you," he said simply. "It has been a hard day, and—"

He broke off suddenly, then added: "Mrs. Hastings, I think I ought to tell you something. I know we're both having the same thought—that an accident may have delayed them, because accidents are no uncommon thing. But I know anyway, that at three this afternoon they were all right. I—I saw them."

"Where?"

In her surprise the question broke from Gay's lips involuntarily, though in another moment she would have withheld it, for Halliday winced.

"My mother was born only a few miles from Anton Bay," he answered quietly. "I took her there today. There was a railroad crossing to pass on the way to the cemetery, and a freight train stopped us—a long freight. There was only the—hearse, and—myself. My sister was too ill to go. While we were waiting an automobile came along beside us. In it were Mrs. Halliday and your husband. Of course—they did not see me."

"Oh, no!" protested Gay, and her breath quickened. She saw the pitiful scene so vividly: the country railroad crossing—the hearse—the solitary "hack" of the village livery, and the lonely man peering out of the depths of that stuffy vehicle at the wife who had refused him the comfort of her presence—looking her loveliest perhaps, and—and another man. . . .

Gay's firm white teeth caught in her under lip to steady it, as Julie's words came back to her. She saw Halliday pleading with his wife, saying: "Angela, I'd like you to go with me." For a moment the room seemed to revolve before her eyes—it was all

OPEN SORES

HEAL IN QUICKEST TIME KNOWN
"I had sores on leg for months. Other remedies failed to heal. Then 'Sootha-Salva' healed them in few days." Jules Simard.
"Sootha-Salva" heals sores, burns, boils, rash, eczema, itch like magic. All druggists.

so terrible; and then, like a breath of life-giving air, a steadying thought flashed through her: Nick was—Nick! She cleared her throat and spoke.

"I am so sorry, Mr. Halliday—sorry my husband should have had any part in causing the pain you must have felt. I understand—just what you have suffered; but—but I want to tell you something you may not realize: No harm will ever come to your wife through Nick. He's young, and sometimes thoughtless of conventions, but he's true as steel. He never had a mean or unlovely thought. Deep down in his heart (though he'd laugh at the idea himself), he's as chivalrous as any knight of old. So—whatever's happened, it—it won't be that."

The eyes she raised to him were those that Nick had said would "snatch a man right back from the jaws of Hades." The white light of truth in their clear depths was like nothing the man had ever seen. It caught his own eyes—held them for a moment. Then, as the thought swept through him that his fears had been not for his wife's safety, but for her sinister influence upon another man, his shamed gaze dropped.

He said, his voice repressed and steady: "I should have known that anyway, Mrs. Hastings, but—thank you for telling me. Perhaps we are unduly upset. Tire troubles sometimes make long delays, and if this shower struck them it would have meant slow going. Do you want me to stay longer, or would you rather be alone? surely we would have been notified had they met with an accident after I saw them. The sensible thing is to go to bed and to sleep."

"Could you?"

(To Be Continued.)

Electron Tubes

Silent Power That Performs Many Marvellous Duties

Industry is rapidly substituting beams of light for some of the clicking cogs of its machines.

Electron tubes are introducing this silent power. The tubes are called the "Tron" twins, Pilo and Thyra, brother and sister of the well-known photo-electric "eye."

Some of them turn on street lights; read temperatures of hot furnaces; furnish automatic train control; turn out electric signs, and run a host of switches for motors.

The "Tron" twins were described to the American Institution of Electrical Engineers by W. R. King, of the General Electric Company in New York.

Newspaper Advertising Profitable

British Radio Manufacturers' Association Makes Successful Deal

After years of experiment, officials of the British Radio Manufacturers' Association are convinced that newspaper advertising is the most productive form of sales promotion. The association, representing leading British radio and allied manufacturers, spent \$5,000,000 in advertising in newspapers during 1930, it was announced recently, and during that period the manufacturers' turnover increased 40 per cent. "Scientific market research," said an official, "reveals that the investment of \$5,000,000 has yielded dividends in detail business to the extent of \$30,000,000."

Today's Best Story

Two hundred years ago, a Danish child of five, Christian Heineken, was the most-talked of child in the world.

He was able to speak within a few hours of his birth, at ten months he could converse intelligently on most subjects, and when he was a year old he had become thoroughly acquainted with the Old Testament. Ill-health caused his death at the age of five.

Guss—"So you sing in a quartet now?"

"Fuss—I do. The other three merely fill in."

Double-deck interurban cars have appeared in England.

Canada's Glacial Period

Covered With Ice a Mile Deep At One Time

A story of the time when the levels of the Great Lakes were 50 feet higher than today, and when the northern part of North America was covered with ice a mile deep, was told members of the Over-Seas Club by Dr. Thomas H. Clark, professor of paleontology at McGill University, Montreal.

Before the last glacial period, the Great Lakes did not exist, said Dr. Clark. Niagara Falls was non-existent and where Lake Ontario now lies was a river, called by geologists the Laurentian River, which followed the present course of the St. Lawrence River, but was longer. The country then had a milder climate than today, he said.

The glaciers left three lakes, one near the lower end of Lake Michigan, one near Lake Superior, and one near the lower end of Lake Erie. Later changes filled out the outlines of the lake system as we know it today, but at a higher level, said Dr. Clark.

The position of Niagara Falls is changing rapidly, said Dr. Clark, moving southward up the Niagara River at the rate of five feet a year, as the water breaks down the limestone at its edge.

After the melting of the glacier, the sea flowed in and covered the St. Lawrence valley, said Dr. Clark. Proof of this is found on Mount Royal, 600 feet above the present sea level, the finding of the skeleton of an Arctic whale at Smith's Falls, and the finding of marine fossils all throughout the area.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

Year's Consumption Of Coal

In a year locomotives on Canadian railways consumed 9,628,711 tons of bituminous coal; 11,409 tons of anthracite coal; 63,796,548 gallons of petroleum, and 35,683 cords of wood. Converting the oil and wood to the equivalent of coal according to thermal values, a total of 10,057,673 tons of coal is reached.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

A patent has been granted for a process for making milk from a combination of coconut milk and pressed fresh meat.

If baby has COLIC

CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

Little Helps For This Week

"Wherefore, beloved, be diligent that ye may be found of Him in peace, without spot, and blameless." —2 Peter iii. 14.

Thou must be true thyself, If thou the truth would'st teach; Thy soul must overflow, if thou Another's soul would'st reach; It needs the overflow of heart To give the lips full speech.

Think truly, and thy thoughts Shall the world's famine feed; Speak truly, and each word of thine Shall be a fruitful seed; Live truly, and thy life shall be A great and noble creed.

—Horatius Bonar.

We know no truth except by action. We can teach no vital truth except through the life. We cannot attain to the eternal joy except as we walk step by step in the path of actual duty and performance in which He walked, who so gained its fulness, and sat down at the right hand of the Father.—Theodore S. Munger.

Cannot Finance Work

Though the B.C. Government favors a line to the Peace River, its financial resources prevent it undertaking the work of extending northward the publicly owned Pacific Great Eastern Railway.

REGULAR PAINS ?

SOME women suffer more than others. Often, when there isn't any need! The pains peculiar to women may be relieved as readily as other pains for which Aspirin is intended. These tablets are always a big help at such times, and never the least bit harmful. (Aspirin does not depress the heart.) Of course, you are familiar with the use of Aspirin for headache. It brings such prompt

relief that sudden headaches needn't upset your plans. It will check a cold, or ease the sorest throat; and comfort the worst sufferer from neuritis and neuralgia.

When your head aches—from any cause—when a cold has settled in your joints or you feel those deep-down pains of rheumatism, sciatica, lumbago, take Aspirin and you can count on real relief.

ASPIRIN
